

Azure OpenAI Hackathon

Azure OpenAI Workshop

Agenda – Day 1

- 01 | Welcome Note & Team Introduction
- 02 | Introduction to Azure OpenAI, Architecture
- 03 | Gen AI use cases overview (Tiger Capability + Approach)
- 04 | Demos - InsightsPro architecture + RAG demo
- 05 | Breakout Session
- 04 | Environment setup & Azure AI studio walkthrough

Agenda – Day 2

- 01 | Hands on Session - Azure AI Studio & Azure AI SDK
- 02 | Module Testing
- 03 | Conclusion & Next Steps
- 04 | Feedback

Azure Open AI Hackathon – Malaysia

Ashish Ram

Lead Data Scientist

With over 10 years of experience, Ashish Kumar R. is a seasoned tech-driven problem-solver specializing in the field of analytics. His passion for AI and machine learning fuels his drive to harness data for creating impactful solutions. Ashish's proven track record demonstrates his ability to effectively apply technological expertise to tackle real-world challenges.

Saikrishna Punna

Senior Data Scientist

With 4+ years of experience, Sai is a Senior Data scientist skilled in transforming raw data into actionable insights. Passionate about using statistical analysis and machine learning to solve complex problems.

Bhavesh Pancholi

Senior Machine Learning Engineer

Energetic & diligent person with strong analytical & problem-solving skills. Expertise in NLP, Generative AI, building ML models, and providing data science solutions. Knowledge in various statistical techniques, tools, programming languages, and domain expertise..

Harsh Saxena

Lead - Machine Learning Engineer

Experienced MLE & MLOPs Engineer with exposure to Data Science, experience in Python, data visualisation, data analysis. Expertise in contextual domains, healthcare, retail.

Prasanth G

Senior Manager, Business Development and Customer Success

Business Development Professional with experience of working in the advanced analytics consulting, telecommunications and construction materials industries. Skilled in market research, building business solutions and proposals, revenue potential analysis, negotiation, and customer service.

Setup Checklist

- 1 Wifi Connection
- 2 Laptop Charge Connection
- 3 Github Link Check
- 4 Username & Login Check – Received and Able to login
- 5 Azure OpenAI Check

Tiger Analytics' coaches introduction – Vietnam

Rajesh Dash

Director-Data Science Solutions

Sulochana Pai

Senior Data Scientist

Natarajan Subramanian

Data Scientist

Shailesh Sharma

Data Scientist

Vivin Karthik

Senior Machine learning Engineer

Experienced Data Science Professional with a demonstrated history of working in the information technology and services industry. Strong understanding of AI, Analytics and Data. Have worked as Cloud Data modernization lead in the US helping clients embrace cloud transformation. Exposure to direct client stakeholders including CXOs.

7+ years of work experience in Data Sciences. Problem solver with hands-on experience in statistical techniques, model building and insight generation. Currently exploring and implementing solutions using GenAI.

Accomplished data scientist with over nine years of expertise in data science and data engineering including extensive consulting engagements with prominent Banking & Finance, Retail, and Insurance firms.

With 5+ years of experience, Shailesh is a Data scientist skilled in transforming raw data into actionable insights. Passionate about using statistical analysis and machine learning to solve complex problems.

6 plus years of experience in Machine Learning, MLOps, Data Science, Spark, AWS, Hands-on on Azure, Python, Containers, Serverless, DevOps, Terraform.

Research & Benchmarking

Top Use Cases

Wealth Coach

Azure OpenAI powered Chatbot to help influence customer investment

3D Avatar

Integrating Custom LLM into its creation of a Generative 3D Avatar for a Large FMCG Company

Planogram Audit

Planogram Compliance Audit and Store Execution Data Digitization for a Large CPG Player

Image Enrichment

Image Enrichment with rich backgrounds through GenAI

Driving OpenAI Adoption and Cross-Selling at GCash

Use Case 1: Wealth Coach Chatbot

Objective: An Azure OpenAI powered Chatbot to help influence customer investment on various GCash's investment products

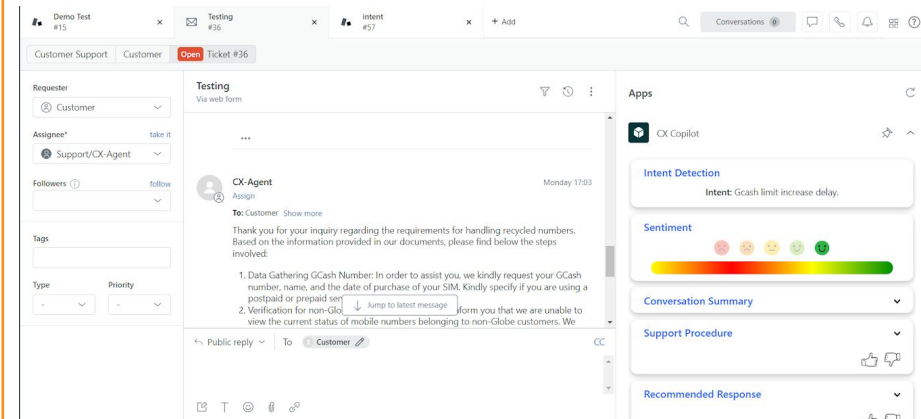

Expected Outcome: A chatbot to proactively propose the end users on investment recommendations based on the customer profile

Use Case 2: Agent CoPilot

Objective: A CoPilot that leverages Azure OpenAI to aid the customer support agents in responding to the customer queries effectively and measure the customer sentiment

Expected Outcome: Help reduce the Average Handling Time and improve the accuracy of responses for the Customer Support Agents

Ongoing Discussions:

- Fabric
- Analytics COE
- Data Tribe Consultancy
